REST API Practical Exercise

Build a REST API using Node.js and Express to manage hostel student records and test using Postman.

In-Class Task (1 Hour)

Use an array to store data and implement the following endpoints:
- POST /students
- GET /students
- GET /students/:id
- PUT /students/:id
- DELETE /students/:id

Fields

Each student record should have 3–5 fields such as:
id, name, roomNumber, course, checkInDate

Homework Task

Modify the API to use an object instead of an array.
Use UUID as key and update all operations accordingly.

Submission

Submit a ZIP folder containing:
- Code file
- Postman screenshots
